**BEFORE UTILITIES ARE DISCONNECTED:** *An amended site plan approved by the Planning Board may be required prior to the issuance of a demolition permit. A determination should be made regarding whether an amended site plan is required before utilities critical to occupant safety and fire protection are disconnected, including electricity and water. The Planning Department staff can assist you in this determination.*

Demolition of structures must comply with the provisions of Section 3303 of the 2009 International Building Code:

*Section 3303.6 Utility Connections: Service utility connections shall be discontinued and capped in accordance with approved rules and requirements of the authority having jurisdiction.*

Before the Department of Building Safety issues a demolition permit, this approval form must be completely filled out and signed by all the utilities and city departments listed below, along with the completed demolition application. Written notice shall be given to the owners of adjoining lots and to the owners of wired or other facilities of which the temporary removal is necessitated by the proposed work.
